PROFESSIONAL SUMMARY

Highly motivated Computer Science student with a strong foundation in front-end development and practical experience in AI/ML project implementation. Seeking to leverage technical skills and a commitment to continuous learning to contribute to cutting-edge web development projects.

TECHNICAL SKILLS

Python, ml, django, html, css, flask

EDUCATION

Bsc computers S.D.H.R Degree College	2025 81%
Mpc Ags jr govt college	2022 67%
10th Zphs govt school	2020 90%

EXPERIENCE

Python fullstack intern ThinkChamp pvt ltd	Aug 2025 - Present
- Developing full-stack web applications using Python and Flask while optimizing existing web modules. - Connecting interactive front-end designs with robust backend logic and database systems.	

PROJECTS

Ai health diagnosis system	Flask,My sql
- Developed a machine learning model using Python to predict disease based on health symptoms - * Utilized ANN algorithms to preprocess health reports datasets and implemented a user interface for results visualization.	
Realtime gym website	Django,sql
- Built a dynamic management application featuring user registration, membership tracking, and responsive design. - Integrated real-time updates for class schedules and trainer availability across mobile and desktop devices.	

CERTIFICATIONS

- Python fullstack certificate -ThinkChamp
- PGDCA-Nict institute

LANGUAGES

telugu, english, hindi
